## EDUCATION

**Loyola institute of technology and management**                                     Guntur
Computer Science and Engineering B.Tech                                      Nov 2021 - May 2024
*CGPA: 7.8*

**M.B.T.S Govt Polytechnic College**                                              Guntur
Electrical Electronics and Engineering Diploma                               June 2018 - Nov 2021
*CGPA: 7.2*

**Sri Poojitha Public School**                                                   Guntur
AP-SSC 10th class                                                           April 2017 - May 2018
*GPA: 10*

## EXPERIENCE

**Accenture | Data Analytics and Visualization**                            Feb 2024 - June 2024
* Completed a simulation focused on advising a hypothetical social media client
as a Data Analyst at Accenture
* Cleaned, modelled and analyzed 7 datasets to uncover insights into content
trends to inform strategic decisions
* Prepared a PowerPoint deck and video presentation to communicate key insights
for the client and internal stakeholders

## SKILLS

Programming Languages:     C++, Java, Python, HTML/CSS
Libraries/Frameworks:      JavaScript, Basis of React.js
Tools / Platforms:         Git, GitHub, Vs code
Databases:                 SQL, MongoDB

## PROJECTS / OPEN-SOURCE

**Improving Shopping Mall revenue by real-time customized digital coupan Issuance**          *Data Analytics, Python, MySQL, JavaScript, Java,Machine Learning*

The goal of this project is to develop a system that issues real-time customized digital coupons to shoppers in a mall, with the aim of increasing revenue for the mall. The system will use data analytics and machine learning algorithms to analyze customer behavior, preferences, and demographics, and issue personalized coupons that are likely to be redeemed.

**Fake Product Identification Using QR Codes and Machine Learning**
*Python,Java,TensorFlow,MySQL,AWS*

The Fake Product Identification System is a cutting-edge solution designed to help manufacturers, distributors, and retailers identify and prevent counterfeit products from entering the market. This system uses advanced technologies such as QR codes, machine learning, and cloud-based data analytics to verify the authenticity of products in real-time.

## CERTIFICATIONS

- Data Analytics and Data Visualization - **Accenture**
- Advanced Software Engineering Job Simulation - **Walmart Global Tech**
- Artificial Intelligence - Cognizant.
